

UP FOR GARDEN
UP FOR NATURE
UP FOR ARCHITECTURE

No matter whether you thoughtfully plant the wall, use it for product presentation or leave it empty, it creates a pleasant structure and refreshes the space with a changing play of lights and shadows.

W55 - RETAINING WALL SYSTEM THAT TAKES YOUR GARDEN UP A LEVEL

The system combines all the features of a perfectly trimmed garden. It resolves uneven terrain, gives you space to grow herbs, ornamental grasses and vegetables and creates a harmonious space during the growing season.

Thoughtful design, quality materials and original look that creates a unique atmosphere in the space.

VARIABLE AND ATTRACTIVE AT ALL CIRCUMSTANCES

Possibility to immediately install different seasonal plants.

Visually attractive already when planted.

In the event of plant mortality, the visual sculptural graphic made of high-quality, raw concrete remains.

ECONOMICS

MAINTENANCE

fewer plants = less time per m².
With the number of plants, the time required for routine servicing - revisions, pruning...

OPERATION

The cost of operation is directly proportional not only to the size of the wall, but also to the density of the planting. Proportionally, the cost of less water, fertilizer or substrate consumption decreases.

RENEWAL

Partial plant renewal is necessary during the year. In our wall this is 4-9 times less cost compared to full planting.

SERVICE

Removable plastic pots allow plants to be transplanted outside the wall. Replacement can thus be done quickly and without the accompanying mess.

VERTICAL SOLUTION FOR EVERY WALL

The W90 system is designed so that the steel structure is not dependent on the adjacent wall, which may not even be load bearing. It is even possible to create such a divider with ORIGAMI. Simply anchor it to a ceiling and floor that has adequate load-bearing capacity.

COMPARISON ORIGAMI WALL WITH OTHER SOLUTIONS IMMEDIATELY AFTER PLANTING

1m² = 30ks

1m² = 72ks

1m² = 8ks

SECTION CUT

IRRIGATION DISTRIBUTION
13mm pipes

WATER SUPPLY + DRIP HEADS
capillary spaghetti + 2-4 l/h

OVERFLOW
for drainage of excess water

OVERFLOW GUTTER
for drainage of excess water

HORIZONTAL BEAM
for hanging pots
